

**SCHOOL OF ARCHITECTURE,
UNIVERSITY OF MANITOBA**

Architects: Smith, Carter, Katelnikoff Associates

The building, conceived as a simple rectangular form penetrated by an interior court, will be approached by means of raised bridges which dominate or punctuate the entrance location. It will have facilities to accommodate 300 students of the Architecture and Interior Design faculties, and will contain a library, staff offices, lecture and seminar rooms, assembly and exhibition spaces on the first floor. The second floor will accommodate student drafting areas, storage and washroom facilities and a student lounge. A large basement will contain area for sculpture, free-hand drawing, photography, workshop, studios and necessary mechanical and storage areas. The exterior will be covered with pre-cast panels and curtain walls of transparent and opaque glass.
