

Introducing "THE CABANA"

THESE HOMES EQUIPPED WITH

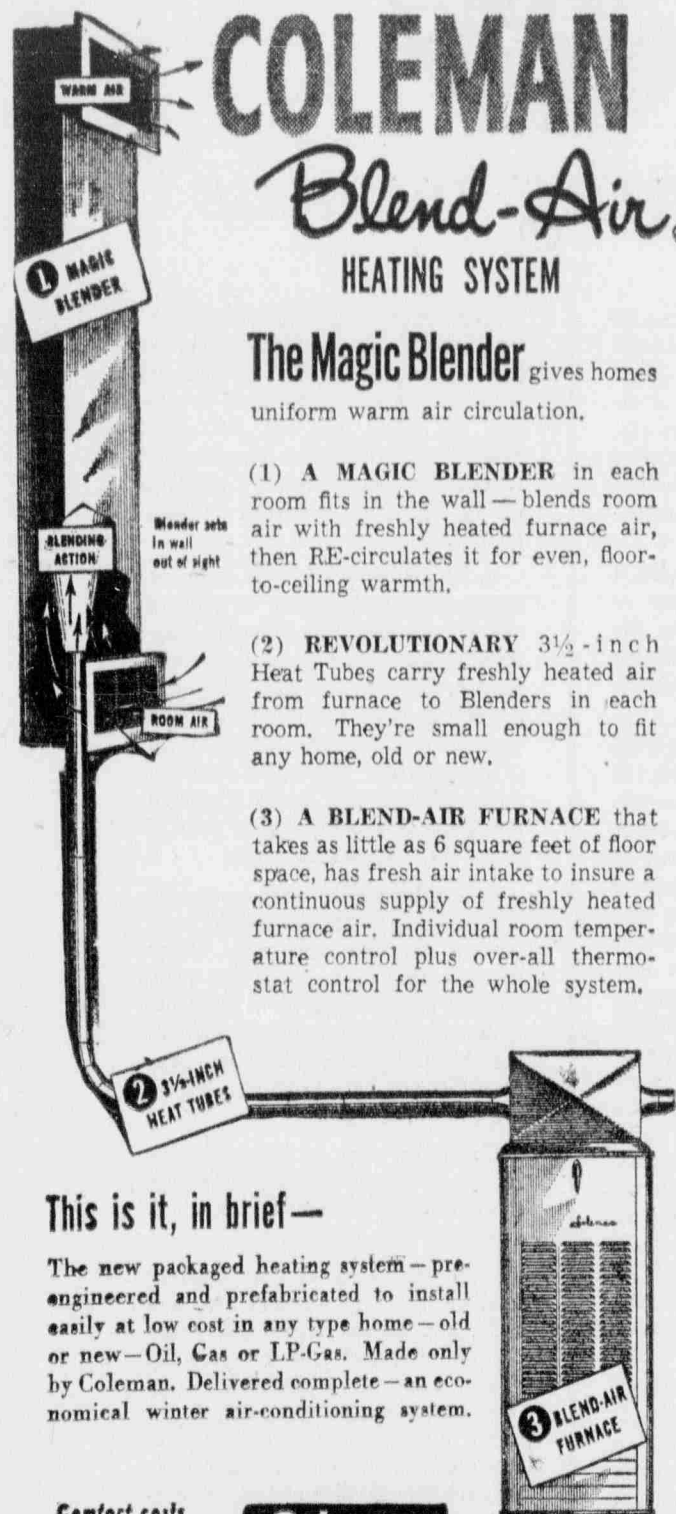

COLEMAN Blend-Air. HEATING SYSTEM

The Magic Blender gives homes uniform warm air circulation.

(1) A MAGIC BLENDER in each room fits in the wall—blends room air with freshly heated furnace air, then RE-circulates it for even, floor-to-ceiling warmth.

(2) REVOLUTIONARY 3 1/2 -inch Heat Tubes carry freshly heated air from furnace to Blenders in each room. They're small enough to fit any home, old or new.

(3) A BLEND-AIR FURNACE that takes as little as 6 square feet of floor space, has fresh air intake to insure a continuous supply of freshly heated furnace air. Individual room temperature control plus over-all thermostat control for the whole system.

This is it, in brief—

The new packaged heating system—pre-engineered and prefabricated to install easily at low cost in any type home—old or new—Oil, Gas or LP-Gas. Made only by Coleman. Delivered complete—an economical winter air-conditioning system.

BOEL & SONS COMPANY LTD.
General Contractor

Manitoba's newest Housing Project "The Cabana" was officially opened on Saturday Dec. 5th at 2.30 p.m.—consisting of over 30 modern homes. Built in St. Boniface at the corner of Hamel and Des Meurons on specially purchased and improved property. The construction and planning was the result of a co-operative group of businessmen and home owners. The success of this co-operative home building venture was due largely to the efforts of David D. Parent, a member of the community, whose ability to organize made it possible for over 30 families to own their own homes. The building committee representing this co-operative group are as follows—President, Bernard Blair; Vice-Pres., Germain Champagne; Directors, Paul and Dennis Morier; Treasurer, Roland Laurin; Secretary, Mrs. Laurin; Adviser, Father A. Couture.

The Following Business Houses Offer
